**Subject:** Support Changing Net Metering Rules

Dear Commissioners:

The purpose of this email is to support changing net metering rules to encourage wider use of solar energy in South Carolina. I am extremely pleased that you are developing progressive policies that will move South Carolina toward reducing our dependency on fossil fuels.

I encourage and support the following:

Increasing the current 100 kw limits for generating solar energy for commercial systems to 2 MW.

Raising the .2% cap for total statewide capacity to 2% of peak demand so more households and nonprofits can utilize solar power.

I am also requesting that you immediately reschedule the cancelled public forum to allow a transparent discussion about solar energy in South Carolina.

Sincerely,

Douglas M Taylor

Columbia, SC 29229
